

ELECTRICAL TESTING

Functional and safety tests for cells,
modules & battery systems

OVERVIEW OF OUR SERVICES

In accordance with standards such as MIL-STD-810H, MIL-PRF and MIL-STD-1275

- | | | |
|--|---|--|
|  Humidity/Climate Testing
20 % to 98 % relative
humidity at a negative
pressure of up to 40 kPa |  Functional, Safety &
Service Life Tests
Voltage $\pm$ 0 to 1200 V
Current $\pm$ 1 mA to 3000 A |  Development
validation tests
Electrical, thermal &
mechanical |
|  Analysis & disassembly
of battery systems |  Tab welding on battery
cells & modules |  Module
Prototyping |
